

**RE: Freedom of Information Request 201718 / 034 – Care Pathway for Psychosis**

Your Query	Date of Request	May 2017
Can I please ask, what is the care pathway for those experiencing a First Episode of Psychosis in your region?		
Response		
All individual patients referred for possible first episode of psychosis would be offered initial assessment through the Community Mental Health Team's consultant psychiatrist. Any treatment plan will be made at that point in time and involvement of other staff would be acted if clinically indicated. We have clinical staff who are specifically trained in the assessment and treatment of first episode psychosis.
