

RE: Freedom of Information Request 201718 / 080 – Resus Trolley Tags

Your Query	Date of Request	June 2017
<ol style="list-style-type: none"> 1. What does the Trust use for securing the contents of resus trolleys? For example is a tamper evident seal used, or a lock and key? (If a seal is used, could you provide a brief description of the type used?) 2. How many of these seals/locking mechanisms are used by the Trust annually? 3. What is the Trust's annual spend on these? 4. Where does the Trust order these from? (If they are procured through the NHS Supply Chain what is their product code?) 5. Who is responsible for ordering this product 		
Response		
<ol style="list-style-type: none"> 1. Tamper evident tags are used on our trolleys. 2. 332 were used in 2016. 3. Approximately £50+VAT. 4. We previously purchased our stock from the NHS National Distribution Centre in Scotland, but this product was recently discontinued so we are actively seeking an alternative. 5. Stock is ordered through our Central Stores department.
